

Perplexity - Free vs Pro

	Free Version	Pro Version
Features and Capabilities	• Conversational interface • Contextual awareness • Personalization • understanding user intent through natural language processing	• Longer context windows • Faster outputs • Complex reasoning capabilities • Priority access during high-traffic periods • Early access to new features • Upload files for exploration using advanced models like Claude 2.1 and GPT-4
User Support	Users of the free version may not have direct support channels like Discord or email for assistance.	PRO users can access direct support through Discord channels, email, and Intercom for quicker responses and assistance from the Perplexity AI team
AI Models	The free version primarily uses an enhanced version of GPT 3.5 as its default model.	In the PRO version, users have the option to upgrade to advanced models like GPT-4, Claude 2.1, or Perplexity's Experimental 70b for more accurate responses and diverse functionalities
Usage Limits	The free version may have limitations on features like Copilot queries.	PRO users enjoy benefits like practically unlimited Copilot queries (limited to 600 uses per day), increased usage of advanced models, and API credits for developers
Content Generation	Not as versatile in creative content generation.	The PRO version offers more creative control over content generation with options to rewrite answers using different models within a thread, making it suitable for various content creation tasks
