

AI Ethics: One-Page Summary

A complete quick reference guide

5 Pillars of Ethical AI

Pillar	Key Principle	Your Action
Fairness	Avoid bias and discrimination	Check for bias in data and algorithms
Accountability	Take responsibility for AI decisions	Document AI development and deployment
Transparency	Be open about how AI works	Explain AI decisions to stakeholders
Privacy	Protect sensitive data	Implement data security measures
Beneficence	Ensure AI benefits humanity	Consider the societal impact of AI

3-Question Risk Assessment

- **Question 1:** Could this AI system unfairly discriminate against any group?
- **Question 2:** Could this AI system cause significant harm if it malfunctions?
- **Question 3:** Are there any privacy concerns related to the data used by this AI system?

What Never Goes in Public AI

- Personally Identifiable Information (PII)
- Protected Health Information (PHI)
- Financial Account Numbers
- Social Security Numbers
- Biometric Data
- Trade Secrets

- Classified Information

Compliance Essentials

- Adhere to all relevant laws and regulations (e.g., GDPR, CCPA).
- Obtain necessary consent for data collection and use.
- Implement data security measures to protect against breaches.
- Regularly audit AI systems for compliance.

Bias Detection Quick Checks

- **Data Skew:** Is the training data representative of all populations?
- **Algorithm Bias:** Does the algorithm perform differently for different groups?
- **Output Disparity:** Are the AI system's outputs fair and equitable for all users?

30-Second Checklist

- ☐ Data is anonymized.
- ☐ Bias checks are complete.
- ☐ Compliance requirements are met.
- ☐ Risk assessment is documented.
- ☐ Approval process is followed.

When to Escalate

- High-risk assessment results.
- Potential legal or ethical violations.
- Unexplained AI behavior or errors.
- Significant stakeholder concerns.

Remember

- AI ethics is a continuous process.
- Collaboration is key to responsible AI.
- Ethical considerations should be integrated into every stage of AI development and deployment.

Emergency Protocol

- Immediately shut down the AI system.
- Notify the AI ethics team or designated contact.
- Document the incident and actions taken.
- Conduct a thorough investigation to determine the cause.

Your Approval Needed For

- Deployment of high-risk AI systems.
- Changes to data privacy policies.
- Use of AI in sensitive decision-making processes.
- Any AI-related initiatives that could impact stakeholders.

Daily Practices

- Question AI outputs and assumptions.
- Stay informed about AI ethics best practices.
- Promote ethical discussions within your team.
- Seek feedback from diverse perspectives.

Staying Current

- [] Read industry publications on AI ethics.
- [] Attend AI ethics conferences and webinars.
- [] Participate in AI ethics training programs.
- [] Follow AI ethics experts on social media.

Success = Responsible AI Use

- By embracing ethical principles and practices, we can harness the power of AI for good and create a more equitable and sustainable future.
