## Risk Assessment Matrix

Use the matrix below to assess the risks associated with your AI use case. For each question, select the risk level that best reflects the potential impact.

| Question                                                                                   | Low                      | Moderate                 | High                     |
|--------------------------------------------------------------------------------------------|--------------------------|--------------------------|--------------------------|
| <b>**What data is being used?**</b><br>_Sensitivity, Volume, Access_                       | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>**Who is affected by the AI system?**</b><br>_Number of people, Vulnerability_          | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <b>**What could go wrong?**</b><br>_Bias, Security, Privacy, Transparency, Explainability_ | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

## Decision Framework

- **All Green (Low Risk):** Proceed with caution. Continue to monitor.
- **Mix of Green/Yellow (Low to Moderate Risk):** Proceed with mitigation strategies. Develop a plan to address moderate risks.
- **Any Red (High Risk):** Halt implementation. Escalate for review and further action. Immediately notify relevant stakeholders. *No new initiatives without executive sign off.*

# Escalation Contacts

In high-risk cases, immediately contact the following individuals/teams:

- ☐ Direct Manager
- ☐ IT Department
- ☐ Legal Team
- ☐ AI Governance Committee
- ☐ HR

**Note:** Document all escalation details, including dates, individuals contacted, and outcomes. Attach relevant documentation. Store securely.
